SINGLE-UNIVERSE WIRELESS DMX/RDM RECEIVER — CLASSIC CRMX

SKT RX

The proven receive-only unit, built on the original LumenRadio CRMX receiver chip.

The SKT RX is the classic of the range: a dedicated, receive-only CRMX unit built on the original LumenRadio CRMX receiver chip. It pulls a full 512-channel universe out of the air from any CRMX transmitter and delivers DMX with full RDM support on its 5-pin XLR. Choose the battery version for up to 12 hours of untethered runtime, or the non-battery version for permanently powered positions.

512 ch | CRMX chip | RDM | Receive-only

FEATURES

- Receives a full 512-channel DMX universe from any CRMX transmitter
- Built on the original LumenRadio CRMX receiver chip — receive-only by design
- Full RDM (Remote Device Management) passthrough
- Available with built-in battery (~12 h runtime) or as non-battery version
- Runs from 5–30 V DC — USB power bank, battery, or rig power
- Compact machined enclosure with power, status and paired LEDs

SPECIFICATIONS

DMX CAPACITY	1 universe (512 channels), DMX + RDM
