SINGLE-UNIVERSE WIRELESS DMX TRANSMITTER

SKT TX

A pocket-size CRMX transmitter that turns any DMX source into a wireless universe.

The SKT TX takes one universe of DMX in on its 5-pin XLR and puts it on air with LumenRadio's CRMX protocol. Built on the TimoTwo module, it runs dual-band 2.4 GHz with Bluetooth Low Energy on board, so you can configure it from your phone with LumenRadio's free CRMX Toolbox app — linking keys, universe colors and output behavior. Power it from anything between 5 and 30 volts: a USB pack through the included pigtail, a spare battery, or the rig itself.

512 ch | TimoTwo | BLE app config | 5–30 V DC

FEATURES

- Transmits a full 512-channel DMX universe over LumenRadio CRMX
- LumenRadio TimoTwo radio — 2.4 GHz with Bluetooth Low Energy
- Configure over BLE with LumenRadio's CRMX Toolbox app (Linking Key, Universe Color)
- Ultra-low latency, interference-resistant frequency-hopping RF
- Runs from 5–30 V DC — USB power bank, battery, or rig power
- Compact machined enclosure with status and link LEDs

SPECIFICATIONS

DMX CAPACITY	1 universe (512 channels)
RADIO	LumenRadio TimoTwo — CRMX, 2.4 GHz + Bluetooth LE
CONFIGURATION	CRMX Toolbox app over Bluetooth LE
INPUT VOLTAGE	5–30 V DC via barrel connector
ANTENNA CONNECTOR	RP-TNC
DIMENSIONS	40 × 27 × 77 mm (1.6 × 1.0 × 3.0 in) excl. DMX connector
CERTIFICATIONS	FCC, CE, Industry Canada

IN THE BOX

- SKT TX wireless DMX transmitter
- RP-TNC antenna
- USB-to-barrel pigtail
